SUMMARY

Deep-tech founder and machine learning researcher with a proven track record of building complex AI ventures from 0 to 1 and driving large-scale outcomes. Combined deep technical expertise in scaling frontier AI models at Isomorphic Labs with extensive founding experience at Entrepreneur First and Ductile AI. Exceptional at architecting cutting-edge ML solutions, securing significant grant funding, and executing from initial concept through to production.

EXPERIENCE

ISOMORPHIC LABS | SENIOR RESEARCH ENGINEER - PERFORMANCE AND SCALING

Jan 2026 - Present | London, UK

| RESEARCH ENGINEER II - APPLIED ML RESEARCH

Nov 2024 - Dec 2025

| RESEARCH ENGINEER - APPLIED ML RESEARCH

Feb 2024 - Oct 2024

- **Executed core research** on frontier AI models, alongside developing advanced performance and scaling solutions to push the boundaries of computational efficiency.
- **Led** machine learning for two drug discovery programs, establishing a robust feedback loop between AI prediction and experimental validation to prioritize high-potential therapeutic candidates.

ENTREPRENEUR FIRST | FOUNDER IN RESIDENCE

Oct 2023 - Jan 2024 | London, UK

- Selected for the globally competitive talent investor program to conceptualize and build a deep-tech venture from the ground up.

DUCTILE AI | FOUNDER

July 2022 - Sep 2023 | London, UK

- **Led** the end-to-end design and development of a robust Visual SLAM system for resource-constrained aerial vehicles, from research to deployment.

RIGR AI | RESEARCH LEAD

June 2022 - Aug 2023 | London, UK (Contract)

- **Secured** 2 years of grant funding from the European Union (EU) for a core research project.

PUBLICATIONS & RESEARCH

ISOMORPHIC LABS DRUG DESIGN ENGINE (ISODDE) | TECHNICAL REPORT | 2026

- Co-authored the technical report detailing the proprietary IsoDDE for end-to-end drug discovery, achieving state-of-the-art performance in protein-ligand structure prediction and binding affinity.

REINFORCEMENT LEARNING FOR SPACE OPERATIONS | MSc THESIS | 2022

EDUCATION

UNIVERSITY OF OXFORD | MASTERS - COMPUTER SCIENCE - MERIT

Oct 2021 - June 2022

BACHELORS - COMPUTER SCIENCE - FIRST CLASS HONOURS

Oct 2018 - June 2021

SKILLS

Languages: Python, C++, CUDA, Golang, Javascript, Julia, Java, Scala, Bash

AI Frameworks & Libraries: PyTorch, JAX, Tensorflow, Triton, XLA, Pallas, Keras

Distributed Systems & MLOps: Docker, Kubernetes, DDP, FSDP, ROS, Linux, Spark
